Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims1-10, drawn to communicating information between computers,
 classified in class 345, subclass 2.1.
 - II. Claims11-20, drawn to touch sensitive screen with display, classified in class 345, subclass 173.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed the communicating system could use other portable computer instead of the sensitive screen. The subcombination has separate utility such as a desktop portable computer, a cash register with touch screen.

2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
